## Education

**Full-stack developer, Plataforma 5**

03/2022 – 09/2022

Immersive learning experience where I devoted more than 800 hours to the study of JavaScript, React.js, Node.js, Express.js, Next.js, SQL, PostgreSQL, MongoDB, GIT and agile methodologies, among others.

**Certified public accountant,**

*University of Buenos Aires*

03/2010 – 12/2015

Cum laude distinction.

## Languages

Spanish (Native)

English (Advanced)

## Skills

HTML, CSS, JavaScript, React.js, Node.js, Express.js, Next.js, SQL, PostgreSQL, Sequelize, MongoDB, Mongoose, GIT, Microsoft Excel, SAP ERP

## Projects

### The show digger

I developed this project on an individual basis as part of a one-week educational assignment from Plataforma 5. It consists of a movie/ TV show finder that consumes TMDB API.

In this website you can sign up, log in, log out, search for movies or TV shows, have a look at the details and add or delete favorites.

Stack: Bootstrap, React-Bootstrap, React.js, Node.js, Express.js, PostgreSQL, Passport.js.

### BBT-TODO

This is an e-commerce that I built together with a team of five student developers as part of a two-week educational assignment from Plataforma 5.

The platform is dedicated to the sale of beverages and allows users to add items to their cart and keep having the cart even after logging out.

Stack: Material UI, React.js, Redux, Node.js, Express.js, PostgreSQL, JWT.

### My appointments

This is a platform I built together with a team of four developers as part of a one-month educational assignment from Plataforma 5 and Cruce.

It consists of a reservations application designed to serve three roles: administrator, branch operator and customer.

Stack: Figma, Chakra UI, Next.js, MongoDB, NextAuth.
